

Sounders

A brief intro to Mimic sounders

Mimic have a very large range of sounders and flashers (either as individual units or combined) grouped briefly as follows:

A. Commercial

These are light duty or control-room applications and include panel-mount or wall-mount types such as the Hawk and Eagle.

Eagle Sounder - [click to view](#)

B. Industrial

These are robust heavy-duty extra loud suitable for use in noisy, dusty industrial and mining operations. In industrial we offer two ranges, (heavy-duty plastic and metal) both continuously rated and with a sound output up to 120dB. Due to the horn design, plastic sounders are more compact for the same sound output.

B.1 Asserta in 3 different sizes (mini, midi and maxi) - [click to view](#)

Mini

Midi

Maxi

B.2 Q-light. Similar sound outputs as the Asserta but all metal and also includes a motorized siren.
